

Environmental product declaration

in accordance with ISO 14025 and EN 15804+A2

Basso 2xE27 Sensor

The Norwegian EPD Foundation

Owner of the declaration:

SG Armaturen AS

Product:

Basso 2xE27 Sensor

Declared unit:

1 pcs

This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A2:2019 serves as core PCR

IBU PCR - Part B for luminaires, lamps, and components for luminaires

Program operator:

The Norwegian EPD Foundation

Declaration number:

NEPD-8956-8601

Registration number:

NEPD-8956-8601

Issue date: 04.02.2025

Valid to: 04.02.2030

EPD software:

LCAno EPD generator ID: 727611

General information

Product

Basso 2xE27 Sensor

Program operator:

The Norwegian EPD Foundation
Post Box 5250 Majorstuen, 0303 Oslo, Norway

Phone: +47 977 22 020 web: www.epd-norge.no

Declaration number:

NEPD-8956-8601

This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A2:2019 serves as core PCR IBU PCR - Part B for luminaires, lamps, and components for luminaires

Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

Declared unit:

1 pcs Basso 2xE27 Sensor

Declared unit with option:

A1,A2,A3,A4,A5,B6,C1,C2,C3,C4,D

Functional unit:

1 Basso 2xE27 Sensor LED luminaire manufactured and installed, used according to a specific lighting regime over 10 years, including waste treatment at end-of-life.

General information on verification of EPD from EPD tools:

Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Verification of each EPD is made according to EPD-Norway's guidelines for verification and approval requiring that tools are i) integrated into the company's environmental management system, ii) the procedures for use of the EPD tool are approved by EPD-Norway, and iii) the process is reviewed annually by an independent third party verifier. See Appendix G of EPD-Norway's General Programme Instructions for further information on EPD tools

Verification of EPD tool:

Independent third party verification of the EPD tool, background data and test-EPD in accordance with EPDNorway's procedures and guidelines for verification and approval of EPD tools. Approval number: NEPDT41.

Third party verifier:

Vito D'Incognito, Take Care International

(no signature required)

Owner of the declaration:

SG Armaturen AS Contact person: Audun Skare Phone: +47 90021243 e-mail: audun.skare@sg-as.no

Manufacturer:

SG Armaturen AS Skytterheia 25 4790 Lillesand, Norway

Place of production:

SG Armaturen production site Dong Guan (China No. 96 Wen Quan South Road, Shi Long Information Industrial Park 523325 Dong Guan, China

Management system:

Organisation no:

958560931

Issue date: 04.02.2025

Valid to: 04.02.2030

Year of study:

2022

Comparability:

EPD of construction products may not be comparable if they not comply with EN 15804 and seen in a building context.

Development and verification of EPD:

The declaration is created using EPD tool lca.tools ver EPD2021.09, developed by LCA.no. The EPD tool is integrated in the company's management system, and has been approved by EPD Norway. NEPDT63

Developer of EPD: Eva Linn Jenssen

Reviewer of company-specific input data and EPD: Audun Skare

Approved:

Håkon Hauan Managing Director of EPD-Norway

Product

Product description:

Attractive, square LED wall luminaire that can be installed both indoors and outdoors. Made of die-cast powder-coated aluminium. Diffuser made of UV-stabilised opalescent polycarbonate, two inputs/outputs for cables, option of both visible and hidden cabling, and loopable terminal block. Corrosion-proof with 10-year warranty, IP65 and vandal-resistant rating IK10.

Socket: 2xE27. Light source included: No. Wattage: max W. Light distribution: Direct. Beam angle: 120°. Control/Dimming: Sensor. Luminiare class: Class I. Housing: Aluminium. Optics: UV-stabilized polycarbonate. Height: 88.0mm. Length: 308.0 mm. Width: 308.0 mm. EAN: 7021986231991

The EPD also covers the following products:

EAN: 7021986111996 - BASSO WHITE 2XE27 SENSOR EAN: 7021986141993 - BASSO BLACK 2XE27 SENSOR

Please note that the above has been calculated with the Norwegian Energy-mix. If you want an EPD with a specific energy-mix, please send us a request.

Market:

Nordic + Northwestern Europe

Reference service life, product

10 years. Estimated based on the characteristics of the product and the intended application.

Reference service life, building or construction works

LCA: Calculation rules

Declared unit:

1 pcs Basso 2xE27 Sensor

Cut-off criteria:

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than 1%) can be excluded. These cut-off criteria do not apply for hazardous materials and substances.

Allocation:

The allocation is made in accordance with the provisions of EN 15804. Incoming energy and water and waste production in-house is allocated equally among all products through mass allocation. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

Data quality:

Specific data for the product composition are provided by the manufacturer. The data represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on EPDs according to EN 15804 and different LCA databases. The data quality of the raw materials in A1 is presented in the table below.

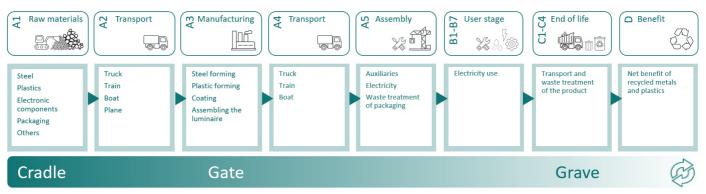

| Materials | Source | Data quality | Year |
|---------------------------------|--------------------------------------|--------------------------|------|
| Electronic - Connector | Material composition + ecoinvent 3.6 | Supplier data + database | 2019 |
| Electronic - Lampholder | Product composition + ecoinvent 3.6 | Supplier data + database | 2019 |
| Electronic - Sensor | Product composition + ecoinvent 3.6 | Supplier data + database | 2019 |

LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD.

Scenario: Facade

Module A4 = Transportation by truck (40 km) from the production site in Dong Guan, China to the harbor. After this the goods are transported by ship (19000 km) from Dong Guan, China to Hamburg, Germany. Then with a truck (650 km) from Hamburg, Germany to the warehouse in Lillesand, Norway or to the warehouse in Mechelen, Belgium + 800 km for Nordic / Northwestern Europe Market.

Module A5 = Installation is performed in the Nordic / Northwestern Europe Market and done by manual labor, with the use of electrical machines, that fall under the cut-off criteria of 1% and is therefore neglected. Packaging of the final product consist of a corrugated board box.

Module B6 = The operational energy use of the luminaire is calculated based on the methodology provided in IBU PCR Part B for luminaires, lamps, and components for luminaires. The energy consumption model for luminaire used in the PCR follows the application scenarios developed in EN 15193:2007. To calculate the electricity use of the luminaire, the following scenario parameters have been applied:

- Active power of the luminaire (Pa) = 30 watt *
- Passive power of the luminaire (Pp) = 0,6 watt
- Daylight time usage (tD) = 0 hours
- Non-daylight time usage (tN) = 1825 hours
- Standard year time (ty) = 8760 hours
- The occupancy depency factor (FO) = 1
- The daylight dependency factor (FD) = 1
- The product specific constant illuminance factor (FCP) = 1
- The non-daylight dimming factor (FN) = 1
- The application specific empiric lifetime of the luminaire in years (a) = 10 years (corresponding to the reference service life of the product).
- * E27 lightbulbs are not included. The calculation is based on max active power.

Module C1 = The de-installation of the luminaire is done by manual labor, with the help of electrical machines. The use of portable electrical devices (e.g., drill) usually have low energy requirements falling under the cut-off-criterion of 1% and is therefore neglected.

Module C2 = Transportation from building site to the waste treatment facility with an average distance of 300km.

Modules C3 and C4 = Waste treatment of the product follows the default values provided in EN 50693, Product Category Rules for life cycle assessments of electronic and electrical products and systems, table G.4. This table specified how different types of raw materials used in A1 will likely be treated during the end-of-life of the product. Waste treatments in C3 include material recycling and incineration with and without energy recovery and fly ash extraction. Disposal in C4 consist of landfilling of different waste fractions and of ashes.

Module D = The recyclability of metals, plastics, and electronic components allows the producers a credit for the net scrap that is produced at the end of a product's life. The benefits from recycling of net scrap are described in formula from EN 15804:2012+A2:2019. Substitution of heat and electricity generated by the incineration with energy recovery of plastic insulation and other parts is also calculated in module D.

^{*}INA Indicator Not Assessed

^{1.} The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the indicator

^{2.} This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

| Biogenic Carbon Content | | | | | | | | |
|---|------|---------------------|--|--|--|--|--|--|
| Indicator | Unit | At the factory gate | | | | | | |
| Biogenic carbon content in product | kg C | 0,00E+00 | | | | | | |
| Biogenic carbon content in accompanying packaging | kg C | 1,87E-01 | | | | | | |
| | | | | | | | | |

Note: 1 kg biogenic carbon is equivalent to 44/12 kg CO2

Additional requirements

Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

| Electricity mix | Source | Amount | Unit |
|--------------------------|---------------|---------|--------------|
| Electricity, China (kWh) | ecoinvent 3.6 | 1102,91 | g CO2-eq/kWh |

Dangerous substances

The product contains no substances given by the REACH Candidate list.

Indoor environment

No effect on indoor environment

Additional Environmental Information

| Additional environmental impact indicators required in NPCR Part A for construction products | | | | | | | |
|--|------------------------|----------|----------|----------|----------|----------|----------|
| Indicator | Unit | | A1 | A2 | A3 | A4 | A5 |
| GWPIOBC | kg CO ₂ -eq | | 2,22E+01 | 7,45E-03 | 9,78E-01 | 1,13E+00 | 6,53E-03 |
| Indicator | Unit | В6 | C1 | C2 | C3 | C4 | D |
| GWPIOBC | kg CO ₂ -eq | 1,46E+01 | 0,00E+00 | 1,37E-01 | 5,39E-01 | 4,85E-02 | 1,88E-01 |

GWP-IOBC: Global warming potential calculated according to the principle of instantaneous oxidation. In order to increase the transparency of biogenic carbon contribution to climate impact, the indicator GWP-IOBC is required as it declares climate impacts calculated according to the principle of instantaneous oxidation. GWP-IOBC is also referred to as GWP-GHG in context to Swedish public procurement legislation.
